Data Flow Diagram

Advantages

-  Easy online submission of Assignments, PPTs & PBLs
-  Centralized access for teachers & students
-  Saves time and reduces manual work
-  Auto-organized subject-wise storage

Problem Statement

Difficulty in submitting and reviewing student assignments

Abstract

The Student Assignment Uploader System is a web-based application developed to simplify the process of submitting, managing, and evaluating academic assignments. It allows students to upload assignments digitally and enables teachers to download, review, and grade submissions from a single platform. The system ensures organized record-keeping, faster evaluation, and transparency in academic workflows.

Guided by faculty:

A sandhya Rani – DS
P sandhya Rani – Java
DNBT Sundari – R Prog

System Design

- Java 
- Spring Boot 
- MySQL 
- HTML/CSS 
-  Programming
-  Data Structures
-  {JSON}

Conclusion

Quick and secure submissions in one place.
Clear updates help teachers and students stay aligned, boosting trust and efficiency.

Future Enhancements

Online grading & feedback

Email/SMS notifications

Cloud storage support

Performance analysis dashboard
